Prediction, monitoring and personalized recomendations for prevention and relief of dementia and frailty

Prediction, monitoring and personalized recomendations for prevention and relief of dementia and frailty

Development of an integrated platform to centralize AI for risk analysis, early diagnosis, and personalized decisions.

Support care providers in designing and implementing personalized, integrated care models.

Improve digital literacy for all stakeholders to promote active, healthy aging.

Develop evidence-based, person-centered healthcare and long-term care models.

Promote innovative care pathways and digital solutions for the daily lives of the elderly, ensuring inclusivity for all.

Enhance elderly well-being by fostering empowerment and self-management through education, training, and innovative solutions.

Pilots

13 pilots at 8 EU members states, 39 partners.

Objective: Large-scale piloting activities that leverage data from divergent sources towards improving dementia and frailty detection and intervention. Comprehensive deployment, validation and evaluation of introduced care strategies and digital tools through real-life clinical scenarios.

- **Cluster A:** Prevention of Dementia at Community Level (Study of causal risk factors towards early diagnosis and primary prevention of dementia at community level)
- **Cluster B:** Association of Dementia and other health conditions (Study of the Association Between the Development of Dementia and Other Health Conditions)
- **Cluster C:** Improved and Personalized Interventions in Dementia (Study of Improved and Personalized Interventions that May Delay and Alleviate Dementia)
- **Cluster D:** Study of neuromechanics and fall prevention
- **Cluster E:** Observatory on Active Ageing (Observatory on Active Ageing: Study of Digital Innovation Hubs and Living Labs to Improve Well-Being and QoL)

Community Forum

A collaborative network designed to sustain and amplify the project's impact long after its formal conclusion.

Key objectives

- Facilitating Access to Innovation Insights
- Enhancing Regional Alignment
- Ensuring Long-term Continuity

Benefits

- Exclusive Resources
- Supportive Network
- Learning Opportunities
- Shape Research & Policy
- Collaborate & Innovate
